

My Antarctic Food Web

Using the information learned in our activities or additional online resources, create your own Antarctic food web! Color, cut out, and organize the organisms to show the flow of energy in Antarctic waters. Draw arrows to show what eats what. Get creative and don't forget-there are many right answers in nature!

Think: How is the Antarctic food web similar, or different then food webs near you?

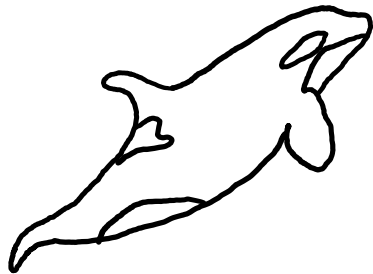

The sun

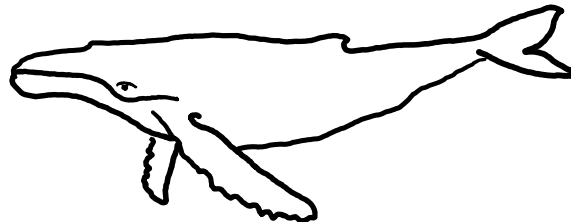

Algae and phytoplankton

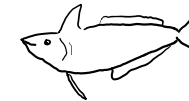

Other zooplankton

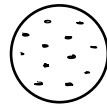

Orcas and other toothed whales

Humpbacks and other baleen whales

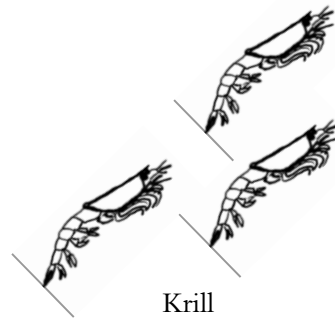

Icefish, toothfish, and other fishes

Bacteria

Adelie penguins

Krill

Skuas, petrels, and other seabirds

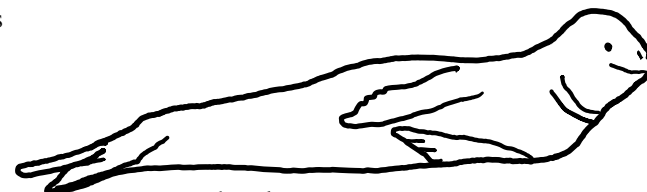

Squid and other invertebrates

Gentoo penguins

Crabeater seals
other seals

Leopard seals
